Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-29 and 38, drawn to a method of securing a device to bodily tissue and an attaching means.

Group II, claim(s) 39-47, drawn to a method of operating an implantable injection port.

Group III, claim(s) 48-65, drawn to a surgically implantable device and a method of surgically implanting a medical implant for performing a therapeutic function.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of the GROUP I invention is an attaching means comprising a housing with a plurality of notches or openings, while the special technical feature of the GROUP II invention is a method comprising the steps of providing an implantable injection port and a protective fixture. Because the special technical feature of the GROUP I invention is not present in the GROUP II claims and because the special technical feature of the GROUP II invention is not present in the GROUP I claims, unity of invention is lacking.

The special technical feature of the GROUP II invention is a method comprising the steps of providing an implantable injection port and a protective fixture, while the special technical feature of the GROUP III invention is a device comprising an attachment mechanism with a fastener and a safety member. Because the special technical feature of the GROUP II invention is not present in the GROUP III claims and because the special technical feature of the GROUP III invention is not present in the GROUP II claims, unity of invention is lacking.

The special technical feature of the GROUP I invention is an attaching means comprising a housing with a plurality of notches or openings, while the special technical feature of the GROUP III invention is a device comprising an attachment mechanism with a fastener and a safety member. Because the special technical feature of the GROUP I invention is not present in

the GROUP III claims and because the special technical feature of the GROUP III invention is not present in the GROUP I claims, unity of invention is lacking.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
